

Kenya Market Simulation

Preparation Directions for Teachers:

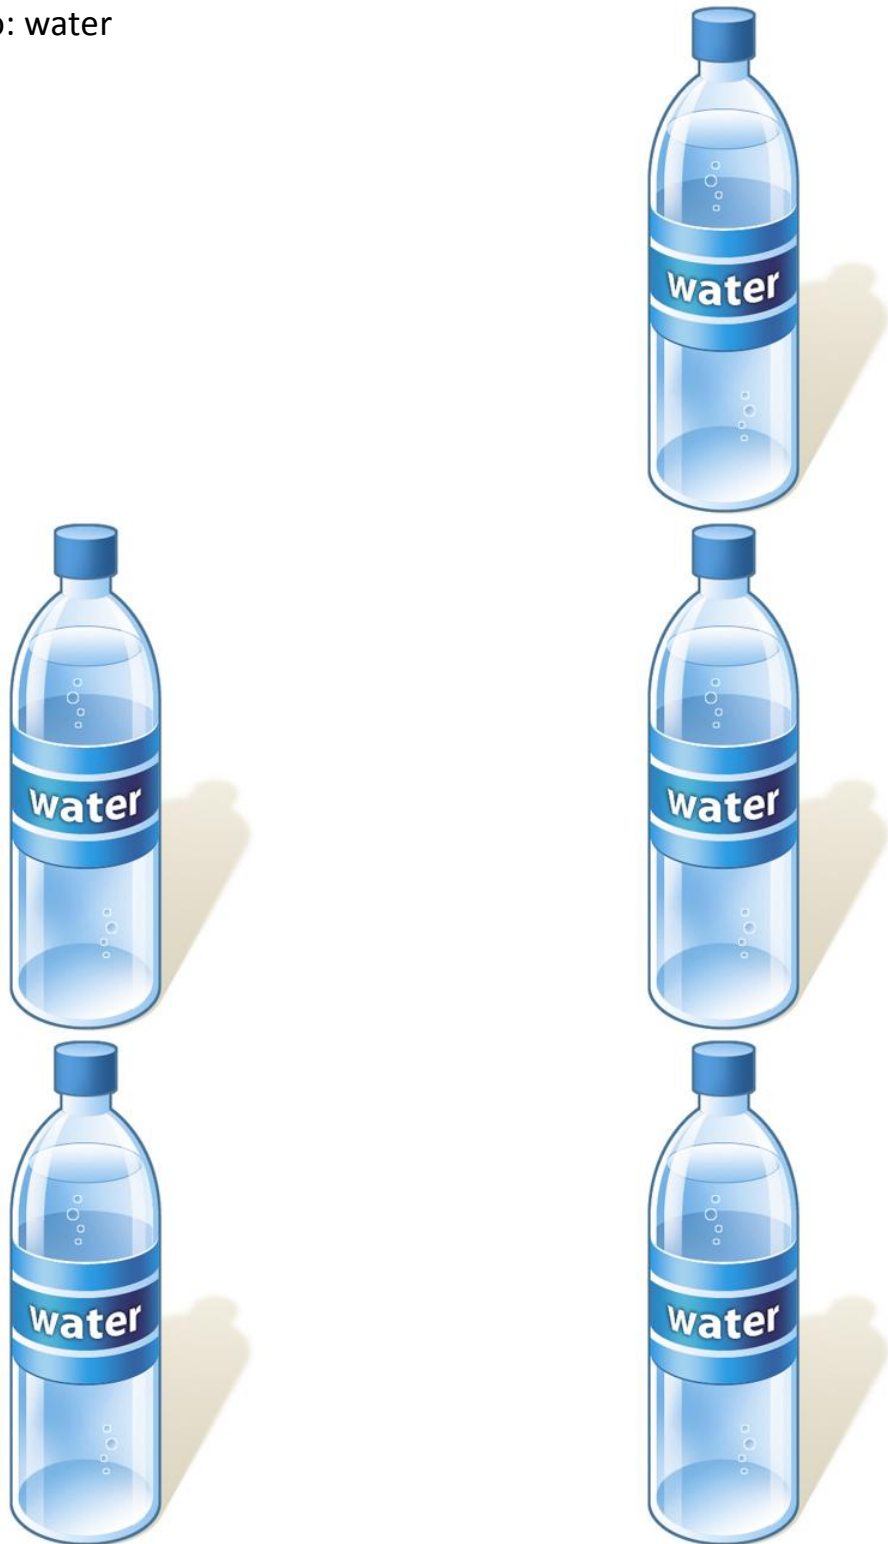

1. Print this document and cut out each item. Paste items onto index cards and laminate for added durability.
2. Separate items by booth label and place the items for each booth into an envelope (12 producer envelopes). There will be a different number of items for each booth to help students understand the role of competition in bartering.
3. Copy enough copies of the shilling below for each of your remaining students (the students acting as consumers) to have 5 bills. Place 5 bills into one envelope making enough envelopes for the remainder of your class.

****This activity is based on a class size of approximately 24 students. Please adjust the numbers as needed.**

Booth One: water

Booth Two: water

Booth three: food

Red-red and fried plantain (a traditional dish)
